

# Finding Profitable Affiliate Products To Promote On Your TrafficMate Powered Blog

Hey there action takers! Let's do something cool, different, and profitable with your TrafficMate powered site. Let's help you find awesome affiliate offers to promote on there!

Now, you might have thought of going the old route already, checking on affiliate marketplaces and whatnot, but we have a different approach that works a hundred times better.

And it is all about using Covert Commissions, the all-in-one tool for affiliates that want to streamline their jobs.

You can join Covert Commissions by visiting “[covertcommissions.com](http://covertcommissions.com)” and following the registration steps, but if you already have a working account, simply start on the dashboard and continue from there.

Next, click on the “new missions” tab in the left-hand sidebar menu. Once in the missions page, locate a mission with an offer that would be of interest to your website’s audience.

For the initiate, missions are simply affiliate packages that contain an affiliate offer, promo tools, and that are promoted for you in the Covert Commissions network after you select it.

Ok, so find a good mission pack on this page and click on the “purchase” button, and then confirm by clicking on “yes”.

Now move to the sidebar menu again and click on the “my missions” tab. In the following page, locate the mission pack you just bought, and click on the “view promo tools” button.

What you’ll do now is to opt in to the squeeze page for the offer so you can get the report. Once you download the report, you are simply going to copy its content so you can repurpose it as a blog post for your TrafficMate powered site.

So first, click on the “squeeze page” URL.

Next, enter your email address into the “email address” field so you can download the report.

Once you download the report, open it in your computer and copy a section of the text that would make sense to repurpose as a blog post.

## Creating Your Affiliate Promo Article

Now it is time to create the article to promote your affiliate offer. Start on your TrafficMate powered site’s dashboard. Next, move over the “posts” tab in the menu, and click on the “add new” option.

Now you are going to compose the article. First, enter the title of the article into the “add title” field.

Next, paste the content you pulled from the report into the text block below.

Now here's the trick to capture leads through this article. First, add a two-lines call to action at the end of the article. Make sure to add an action phrase into the CTA, such as the name of report or the product you're promoting.

Now highlight the action word in your CTA, click on the “link” button in the edit tools menu, and insert the squeeze page URL from the promo tools page, and then click on “apply”. And this is it! You can now post your new article by clicking on the “publish” button.
